Safety Guidelines	▼
-------------------	---

Context

EMTs use the Process Asset Return (PAR) application to manage onsite device return collection requests submitted by requesters on [go/stuff](#) or [go/unstuff](#) .

EMTs also use the PAR app to update the inventory status of all returned Bronco assets to confirm that they are no longer assigned to the requester and are logged back into Bronco inventory.

Purpose

Requesters can return Google owned assets they are no longer using to EMTs who can use the PAR app to log devices back into Bronco inventory so assets can be redeployed or e-recycled following EMT e-recycling processes.

Scope

This article outlines the process for returning all Google-owned devices into Bronco inventory so these devices can be further processed to be redeployed or e-recycled out of inventory.

Process

✕ Collapse all

Checking and Assigning New Orders	^
1. At least twice daily, EMT check the PAR application to assign and comment on new incoming orders, and to follow up on requester communication as needed.	
a. The first check should be at the beginning of the day and the second check should be in the middle of the work day to check for new orders or responses from requesters.	

- i. To check for new orders:
 - i. Select the correct site location in the **Plant No** drop down menu.
 - ii. Click the **Go** button.

2. Assign orders to the EMTs working at the respective collection locations.

- a. Follow these steps to assign PAR orders
 - i. Check the box next to the **Maintenance Order Number** to select orders.
 - ii. Click the **Action** button.

iii. Click **Assign Task to Work Center**.

iv. Select the tech to assign the order.

3. Check each order's **Special Instructions** for the collection date and for any further instructions from the requester. This is not necessary for return locker orders.

- a. Follow these steps to check the **Special Instructions** in PAR return orders.
 - i. Click the **Maintenance Order Number** hyperlink. This opens the **Order Modification App**.

ii. Click the **Q&A...** hyperlink to open the **Special Instructions** window.

iii. Make note of:

- i. The condition of the item.
- ii. If the device has a damaged battery, follow the [Damaged Battery Safety Protocols](#).
- iii. Any accessories that also need to be collected.
- iv. The requested pickup date.

Commenting on Orders to Confirm Pickup Instructions

1. ALL Process Asset Return orders must be assigned and commented on every five business days to confirm their pick up date and instructions.
 - a. Per [Google's device return policy](#), requesters have 10 business days to complete their return, or to reply to EMT's comments to confirm their pick up instructions.
2. Comment on the PAR return order to confirm the collection date and instructions as needed, giving the requester a total of 10 business days to reply/confirm.
 - a. Follow these steps to comment on PAR orders.
 - i. In the PAR app, click on the **Maintenance Order Number** hyperlink to open the **Order Modification App**.
 - ii. In the **Order Modification App**, click the **Comment** button to open the **Notes For: <Order Number>** window.
 - iii. Compose messages to requesters as needed to confirm collection date and instructions.
 - i. Inform the requester that if they do not complete their return in 10 business days, per [Google's device return policy](#), their return order is canceled, their device loses corporate access, and their cost center is charged back.

ii. Use this message (or similar) in the PAR comments:

☆ Hello [Requester Name],

The local inventory team has received your request for onsite desk collection.

Your return order's "Special Instructions" indicate that your device will be ready for pick up on <Date>.

Would you please confirm that your device will be ready on [Date]?

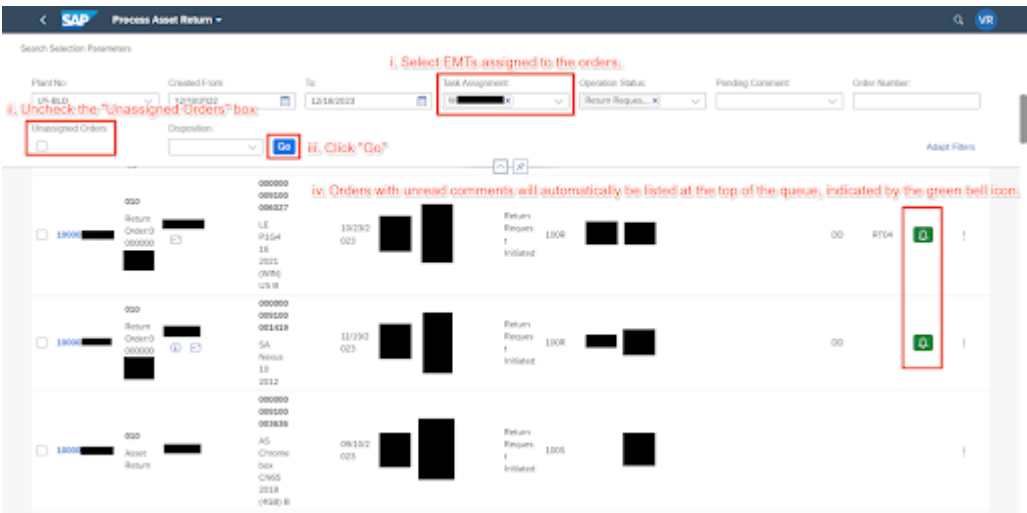

If you do not complete this return in 10 business days, per Google's device return policy we will cancel this order, your device will lose corporate access, and your cost center will be charged back.

Kind regards,
[Tech_name]

iii. Click the **Send** button.

3. Use the steps below to check the order comments daily for updates from the requester.

- a. Select the EMTs the orders are assigned to in the **Task Assignment** drop down menu.
- b. Uncheck the **Unassigned Orders** box
- c. Click the **Go** button.
- d. Orders with unread comments are listed automatically at the top of the queue, indicated by the green bell icon.

4. If the requester does not reply five business days after EMT sent the initial comment to confirm their pickup instructions:

- a. Remind them that if they do not complete their return, per Google's device return policy, their return order is canceled, their device loses corporate access, and their cost center is charged back.
- b. Use this message in the PAR comments:

☆ Hello [Requester Name],

We are following up on this equipment return request.

Would you please confirm the date when your device will be ready for pick up?

If we don't get a reply from you in 5 business days, per Google's device return policy we will cancel this order, your device will lose corporate access, and your cost center will be charged back.

Kind regards,
[Tech_name]

c. If the requester does not reply 5 business days after EMT sent the follow up comment, cancel the order using the process outlined in the **Canceling PAR Orders** below.

d. In **GALLOP**: EMT changes the asset's **Assignment Status to Assigned - Additional**.

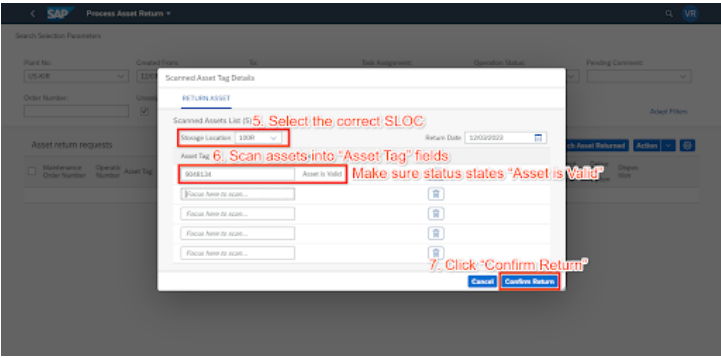

- i. Make a note in the asset comments that per the PAR Maintenance Order Number the device return was not completed.
- ii. For laptops and desktops.
 - i. Inform the requester that per Google's device return policy, their device loses corp access since it has not been returned.
 - ii. Destroy the associated host name for the device.

5. Once the requester confirms the pick up date and instructions, send a comment confirming that their pick up has been scheduled, and proceed with completing the collection per the order instructions.

🔔 If handling Lenovo asset, double check it is not affected by the duplicate asset tag issue and the asset tag SAP record matches the physical device you're trying to return via [go/assetlookup](#) or [go/gallop](#). If you have a device record that

doesn't match, find the actual asset tag by searching the serial number in gallop and either print a temporary tag if device will be recycled, or assign a new asset tag

- 7. Click **Confirm Return**.
- 8. Wait for confirmation of successful returns.

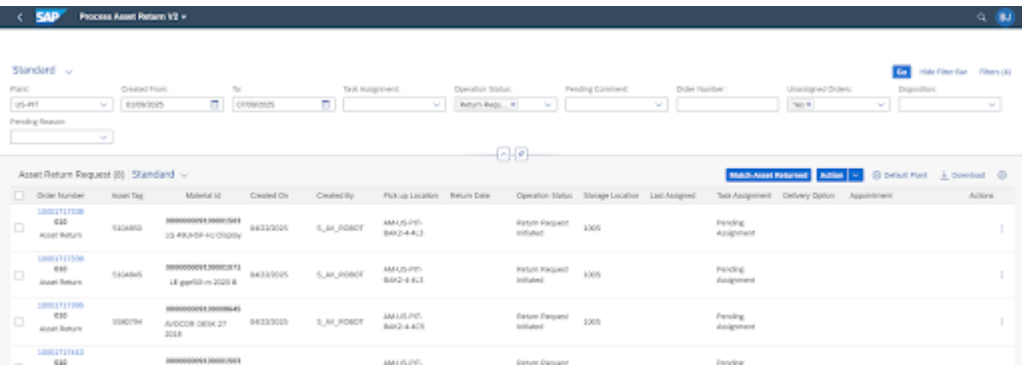

- 9. For asset disposition and next steps, refer to [Device Return \(Clean and Screen\)](#).

PAR and R2R

PAR

Pending

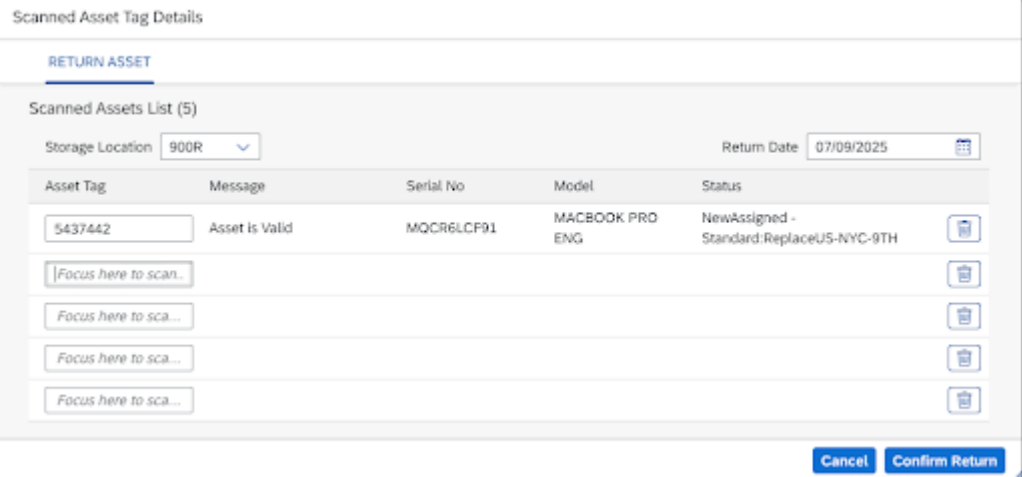

Return work requests cannot be placed in a pending status. These are utilized the same as in a deployment work request.

Pending Date of Event - Work on the work request is pending a future date. For example, the requester is asking for pick up on a specific date.

Pending In Transit - For use on work requests which are in transit. This can be use for work requests which have had packing material sent and EMT are awaiting the return of the device.

Pending Technical Issue - When a technical issue prevents the resolution of the work requests. These should be a documented reason for placing a work request in this status.

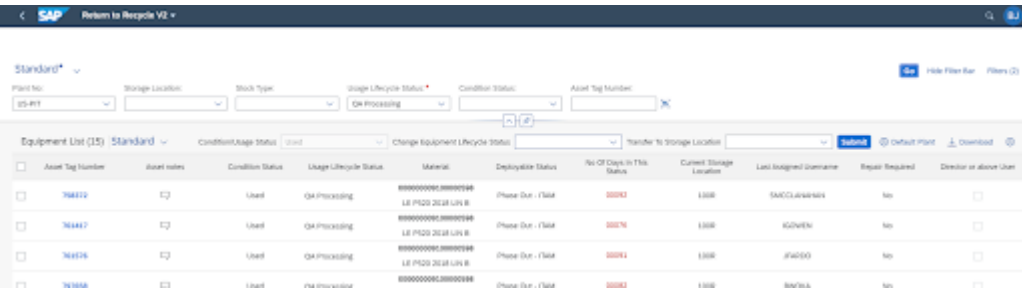

Scanning

Additional information is now displayed when scanning an asset for return. The additional information can be used to confirm details of the device being returned during the scanning process.

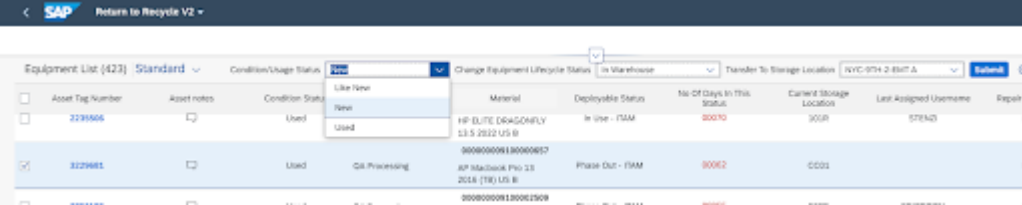

Random bits

- There is now a download option to export results to a file.
- There are new filters and filtering options.
- Reminder to review the **default** queue several times per day to ensure no orders are missed for your plant.

Condition/Usage Status

The ability to set the condition of the returned device has been added to the R2R app.

Setting the condition of the device should only be used in select situations. The default of any returned device is **Used**. This should be employed in most situations and no additional work is needed when processing the asset through RTI.

Used - Any returned device. These may be tier 2 or tier 3 assets which show signs of wear.

Like New - Returned tier 1 assets which are in good condition and suitable for re-assignment in processes which may require **new** equipment.

New - Returned asset which has seen no or limited use. For example, a device returned from a Noogler no-show or an asset which was assigned to a cancelled order which needs to be returned.

To set the condition of an asset:

- 1. Select an asset from the list.
- 2. Select **In Warehouse** from the **Change Equipment Lifecycle Status** drop down.
- 3. Select the needed condition from the **Condition/Usage Status** drop down.
- 4. Select the storage location from the **Transfer To Storage Location** drop down.
- 5. Click **Submit**.

Random bits

- There is now a download option to export results to a file.
- There are new filters and filtering options.
- Reminder to review the **default** queue several times per day to ensure no orders are missed for your plant.

Cancelling PAR Orders

EMTs cancels PAR return orders in the following circumstances:

- If the requester does not reply to EMTs comments to confirm their desk collection instructions within 10 business days of EMTs receiving the order.
- If the device is not found and the requester does not reply to a follow-up comment from EMT within five business days.
- If the requester has not returned their device to a return locker within 10 business days of creating their return request.

To cancel orders in the PAR app:

- 1. Find the orders by selecting the EMTs assigned to the orders in the **Task Assignment** dropdown menu, or by entering the Return Order Number.
- 2. Click the **Go** button.
- 3. Check the boxes next to the orders to be canceled.
- 4. Click the **Action** button.
- 5. Click **Cancel Order**.
- 6. The **Reason for Cancellation** window opens.
- 7. EMT enters the reason for cancellation, and add the below canned response explaining the reason for cancellation.

☆ Hello **[Requester Name]**,

Since we did not get a pick up date confirmation from you, we will cancel your order for now.

Please submit a new return request whenever you're ready to complete this return.
Kind regards,
[Tech Name]

- 8. Click **Submit**.
- 9. In **GALLOP**: EMT changes the device’s **Assignment Status** to **Assigned - Additional**.
 - a. Make a note in the device comments that per the PAR Maintenance Order Number or the associated GUTS ticket number, the device return was not completed.
 - b. For laptops and desktops:
 - i. Inform the requester that per [Google’s device return policy](#), their device loses corp access since it has not been returned.
 - ii. Delete the associated host name for the device.

Self Check

Successful completion of this process ensures that assets are efficiently and effectively removed from the requesters account and available for further processing by EMT.

Remember to:

- Confirm the pick up date, location, and further instructions for onsite desk collections.
- Check and empty legacy return lockers daily.
- Check Stuff Station Secure lockers each time you visit the stuff station for any reason.
- Process all assets through PAR as soon as they have been collected.
- Delete host records.
- Any time a return order is canceled, remember to change the asset to Additional in **GALLOP**.

Expected Resolution

- Return lockers must be emptied daily.
- Assets must be processed through PAR within 3 days.
- Recommendation is to process all assets on the same day they are collected.
